Job Corps is a national vocational job training program administered by the U.S. Department of Labor. The program offers a link for low income youth from 16-24 years old with education, job training and

placement. The Milwaukee project is 8 buildings on 25 acres. Tours will focus on the sustainable building features including geothermal heating and cooling system, daylighting and lighting controls, building energy efficiency, recycling of building materials, storm water control, and sustainable landscaping.
